

WATER TREATMENT SERVICES

- Mac-Tower Inc. offers two options of water treatment for your evaporative cooling system:
 1. Pulse~Pure® (Non-Chemical) Water Treatment System can be installed on all makes of cooling towers and offers an environmentally responsible alternative for treating cooling tower water. This innovative approach uses pulsed power technology to provide chemical-free water with no harmful by-products.
 2. The SmartShield (Dry Chemical) Water Treatment System improves the ease and safety of chemically treating the spray of a closed circuit cooler, evaporative condenser and cooling tower. SmartShield can be field installed on all makes of coil products to effectively control scale, corrosion and biological growth in recirculating water.
- Specialty Services:
 - Lakos Water Filtration System (can be used on closed loops and open loops)
 - Supply and Installation
 - Monitoring
 - Chemical Sales
 - Parts Sales and Replacement
